PROFILE SUMMARY

Aspiring Node.js Developer with hands-on experience building production-style full-stack applications using Node.js, Express, MongoDB, and REST APIs.

Strong understanding of backend architecture, scalable systems, and clean code practices with MVC design patterns.

Proficient in debugging APIs using Postman, implementing security best practices, and building SaaS product architectures.

EDUCATION

Ganpat University, Department of Computer Science

2023 – 2026

B.Sc. IT (Infrastructure Management Services)

Ahmedabad, Gujarat

PROJECTS

Travel Agency Platform - SaaS Application | Node.js, Express, React, Stripe, AI API

2025

- Built a production-style travel booking platform with public user access and a secure admin dashboard for trip management.
- Designed backend services for authentication, trip CRUD operations, bookings, and real-time analytics tracking.
- Implemented AI-assisted itinerary generation based on destination, budget, interests, and group type.
- Integrated Stripe payment gateway for secure booking and checkout workflows with transaction management.
- Developed admin analytics dashboards to track user growth, booking trends, and trip performance metrics.

Subscription Tracker MVP - REST API | Node.js, Express, MongoDB, Mongoose, JWT

2025

- Designed and developed a RESTful API to manage recurring subscriptions with full CRUD operations and validation.
- Implemented JWT-based authentication with secure session handling, protected routes, and middleware architecture.
- Designed MongoDB schemas using Mongoose with enums, timestamps, indexed fields, and priority management.
- Implemented CORS, Helmet security, centralized error handling, and logging for production readiness.
- Built a React dashboard consuming backend APIs with filters, metrics display, and real-time updates.

Linux Automated Backup & Recovery System | Bash Scripting, Cron, Linux (Ubuntu), Rsync

2026

- Developed a comprehensive shell script to automate daily backups of critical system directories.
- Implemented automated compression (tar/gzip) and remote transfer of backup archives via SCP/Rsync.
- Configured Cron jobs for scheduled execution and integrated error logging for monitoring system reliability.
- Created a recovery module to restore system states efficiently from archived backups.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, Python (Basic)

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware, MVC Architecture

Frontend: React.js, React Router, Next.js, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, Mongoose, Appwrite, MySQL, Oracle, PostgreSQL

Cloud DevOps: AWS, Docker, CI/CD Pipelines, Git, GitHub, Postman

Security: CORS, Helmet, Environment Variables, Stripe API, OAuth

CERTIFICATIONS & COMPETENCIES

- IBM Full Stack JavaScript Developer Professional Certificate - 2025
- AWS Cloud Practitioner Essentials
- Core Competencies: RESTful API Design, Backend Architecture, Database Modeling, AI-Integration
